DIPACO now has available an improved gear pump for the Cummins Celect fuel pump assembly. The D4954880 gear pump replaces the D4010324 gear pump as well as all previous versions on N14, L10, M11 ISM, ISMe and QSM engines using the Celect fuel system.

The older D4010324 gear pump used an external cooling pipe and a check valve. The improved D4954880 gear pump added internal drilling which eliminated the need for an external cooling pipe.

D4010324 (Old Style)  D4954880 (Improved)
