

Count on Chief Enterprises for disc horns, air horns, back-up alarms, accessories, and more.

We can deliver kits or pre-assembled components ready for you to install.

## Electromagnetic Horns

### Series 25M

This compact horn is designed and tested specifically for motorcycle and scooter type applications. The 25M is a high tone horn, available in 12V with a sound range of 105-118dB(A) at 1,5A.

ECE R-28 and EEC70/388 approved.

### Series 65C

Vertical type shell horn with rectangular outlet designed to obstruct water flow when mounted correctly. Available in 12V producing a powerful sound at 105 dB(A) at 5A.

ECE(E1), EEC(e1) approved.

### Series 55B

As the smallest horn in its class the 55B produces a high quality sound up to 105 or 110 dB(A) min at 3.5A with a lightweight design. With 100K guaranteed cycles, the 55B is ideal for passenger cars, utility vehicles, and motorcycles.

ECE(E1), EEC(e1) approved.

### Series 65G

Newly tooled 65G is smaller and lighter in design without compromising performance. Provides a more directional sound and guarantees 100K cycles of 110 dB(A) sound level at 5A, the loudest in the market.

### Series 50F

Suitable for OE trucks, buses, & heavy duty machines, the 50F is available in 6V, 12V, and 24V with a sound level up to 113 dB(A) min at 4A.

ECE(E1), EEC(e1) approved.

## Solid-State Horns

### Series 62E

Electronic shell horn ideal for applications requiring extensive use over two million cycles. Features exceptional durability and a guaranteed sound level of 108 dB(A).

ECE(E1), EEC(e1) approved. No EMI

### Series 60B

With over 20 years of production the 60B is known for its durability and preferred for its powerful sound up to 105 dB(A) at 6A.

ECE(E1), EEC(e1) approved.

### Series 68E

Approved for over two million cycles at a guaranteed 108 dB(A) at maximum 5A. Features exceptional durability and is suitable for applications that require extended use.

No EMI

### Series 65B

Smaller in dimension and weight than the 60B series without sacrificing performance. The 65B guarantees 105 dB(A) at maximum 5A. Tested and recommended for OE applications.

ECE(E1), EEC(e1) approved.

## Air Horns

### Trumpet

Available in single, double, and triple projector configurations in different sizes allowing for a wide variety of sound. Trumpet materials include stainless steel, chrome-plated, and plastic.

### Compact

Our offering of Turkish made compact air horns deliver powerful sound without sacrificing real estate. Suitable for rugged commercial vehicle applications.

#### Series 90AH

Only applicable for vehicles equipped with an air tank. Maintains a smaller size compared to other air horns with a sound level of up to 115 dB(A). Single solenoid type available as 12V or 24V.

#### Series 80JH/81JH

The 80JH Unichorn and 81JH Ram Horn were designed specifically for applications with limited space. Their curved trumpets occupy significantly less space than the traditional trumpet horn. Available in 12V or 24V with a sound level of up to 125dB(A).

## Back-up Alarms

#### Series 51005

Self grounding warning device applicable to light duty and heavy duty vehicles, trucks, and buses. Features 97 dB(A) at 12/24V and multiple mounting options.

#### Series 51006

Ideal for cars, light and heavy duty vehicles, heavy equipment, and tow motors. Features up to 107 dB(A) at 12-48V, fiberglass filled nylon housing, and horizontal or vertical mounting.

SAE and DOT compliant.

Our product line of audible warning devices complies with all industry standards and is ideal for a variety of applications including passenger cars, heavy-duty vehicles, utility vehicles, and motorcycles. Our engineering team works with you to find the disc horn, air horn, or back-up alarm for your specific need as well as offer an array of wire harness and relay accessories.

#### Series 51008

Applicable to cars, pickups, and light-duty vehicles, this self grounding back-up alarm is available in 12-24V with a sound up to 97dB. The 51008 can be mounted horizontally or vertically and is polarity protected.

SAE and DOT compliant.

#### Series 51026

Loudest single audible level, self-adjusting warning device ideal for transportation applications. Features 87 dB(A)-112 dB(A) at 12/24V.

SAE and DOT compliant.

#### Series 52050

Multi-functional back-up alarm with flashing 200 lumen LED warning lights and night silent function. Available in 12-24V with a maximum sound of up to 107dB. For use in dump trucks, trucks, forklifts, construction vehicles, mining vehicles, and semi-trailers.

SAE and DOT compliant.
