## JABRA PRO 9400 SERIES CHARGER. KEEPING YOU IN CHARGE.

In the hectic world of 24/7 hotlines, alarm centers and emergency services, several shifts often share the same workstation. When people have a personal headset, yet the headset base is part of the phone installation, they need a place to charge their headsets when they're not at work.

The Jabra PRO™ 9400 Series Charger charges spare headsets when the wireless system is continuously in use, keeping teams in action around the clock. That means no down-time when new shifts come in.

### SCALES TO YOUR NEEDS

The Jabra PRO™ 9400 Series Charger is scalable to suit all charging needs. The single unit wall charger is perfect for individual workstations while the economical five-unit rack powers up to five headsets at a time. With the possibility of either mounting the charger on the wall or placing it as a stand-alone unit on the desktop, true flexibility is brought to the workspace.

- Fits all Jabra PRO™ 9400 Series headsets
- Available as a single unit or as a rack for powering up to five units at a time
- Wall-mounted or used as desktop charger
- Max Charging time: three hours (single unit)  
five hours (five-unit rack)
