NEW INJECTION PUMP ADAPTER TO HOUSING GASKET FOR MACK

Mack has released a new injection pump adapter to housing gasket, part number 590GB2133. This gasket is identical in material and shape to D590GB190D gasket offered by DIPACO except it has a silicone bead around the injection pilot bore. This new gasket is for use with Mack 6 cylinder engines with serial number 239GB5480 or higher.

The D590GB190D gasket is used on blocks prior to 239GB5480. It can also be used on the newer blocks by adding a bead of silicone sealant on both sides of the gasket approximately 3/8" from the bore opening. The price of the D590GB190D gasket is \$0.51 each.
