

Injector Pressure Regulators For Ford 7.3L Power Stroke

DTech now has available one new and two remanufactured injector pressure regulators (IPR) for Ford 7.3L Power Stroke and Navistar T444E applications. The new IPR is built in the US. The remanufactured IPRs are remanufactured in the US.

Additionally available is an IPR repair kit, part number DT730024. The kit includes the jam nut and o-rings needed to service the IPR. Often replacing the o-rings in the IPR will fix problems with it. Please refer to DIPACO Product Information Bulletin FI-96 for more information.

All part number and application information can be found below.

APPLICATION INFORMATION

INJECTOR PRESSURE REGULATORS			
Model Year	Application	OEM Number	DTech Number
