

Injection Lines For Dodge 5.9L Common Rail Applications

DTech now offers the injection lines for the Dodge 5.9L common rail engine used in model year 2003 – 2007 Ram pickups.

To prevent line failures, Injection lines for cylinders 2 – 6 incorporate the updated isolators. An isolator is not used on the first cylinder.

Part numbers and cylinder reference can be found below.

Part Number	Cylinder	Reference Number
