

Sprinter Van Injector Mounting Kit

DTech now offers the injector mounting kit for the Sprinter Van, covering model years 2000 – 2006. Part number for the kit is DT270007.

The kit includes the parts for mounting five injectors. The kit contents are the mounting bolt, nozzle washer, return connector o-ring, and return connector retaining clip.

Caution: The injector hold down bolt is a one-time use and must be replaced if removed. Reuse of a bolt that has been previously torqued will result in an injector coming loose and combustion blowing by the copper nozzle sealing washer.
