

DTech Remanufactured Dodge 6.7L Common Rail Injectors For Cab Chassis Applications

DTech now offers remanufactured injectors for Dodge 6.7L cab chassis applications. Part number DT670006R covers model years 2007 – 2010.5. Part number DT670007R covers model years 2010.5 – 2012. Part number DT670008R covers model years 2013 – 2018. These injectors are not for use in pickup applications. For injectors covering those applications, see Product Information Bulletin FI-308.

Each DTech remanufactured Dodge 6.7L injector features a new nozzle, new control valve assembly, and new internal / external seals. Injectors are backed by a two year, unlimited mileage warranty*. Additionally:

- All assembly and key operational characteristics including flow and response time are verified to meet DTech specifications.
- Each injector is laser marked with an individual injector correction code (IQA) for entry into the ECM. Refer to Product Information Bulletin FI-309 for additional information regarding IQA.

In addition to injectors, DTech offers high-pressure injector connectors, a remanufactured CP3 fuel pump, an injector installation kit, and valve cover gasket kit for Dodge 6.7L applications. View the current DTech Product Guide or visit the DIPACO / DTech website for more details.
