

# VACULOAD IV

## DESCRIPTION

The Vacuload systems have been especially designed for blasting sites and for handling abrasives. The Vacuload IV is the workhorse of the Vacuload range. It is the preferred vacuum system for tank contractors as it is high capacity and high efficiency.

Vacuload IV is powered by compressed air which saves you the cost of another expensive motor (when you have finished blasting, simply switch your compressed air lines from your blast machine to your vacuload system and you're in recover mode).

## APPLICATIONS

The Vacuload IV is suitable for onsite tank contractors.

## KEY FEATURES

- Portable and versatile
- Separate interceptor system
- Dust collection suitable for lead
- Low cost barrier to purchase
- On-the-job clean up
- Vacuum load your blast pot

PART NUMBERS	
VAVaculoadIV	Vacuload Series IV

SPECIFICATIONS	
Compressed air required at 120 psi	900 cfm
Electrical Power Required	Not required
Dust Collector Size	4 Cartridges
Filtration Area	904 sqft / 84 m <sup>2</sup>
Automatic Reverse Pulse Cleaning	Included
Conveying Capacity (Garnet)*	8 ton/hour
Height	116 in / 2950 mm
Length	116 in / 2950 mm
Width	49 in / 1250 mm
Size Vacuum Hose	6"

\*Subject to confirmation – conveying capacity is subject to inlet compression air pressure, temp, abrasive density and size, length and size of vacuum hose. These rates are indicative on base on using 50 ft (15 meters) of vacuum hose.
