

**Injector Sleeve Kit GM
6.6L For Duramax LB7
Engine**

DTech now has available the injector sleeve, part number DT660035, for use in the GM 6.6L Duramax LB7 engine. Unique in the industry, the DTech injector sleeve comes with the sealing o-rings already installed. GM and most parts suppliers sell the sleeve and o-rings separately, which can lead to inventory issues or customer confusion.

The DTech injector sleeve kit replaces GM part numbers 97188463 (sleeve) and 94051259 (o-rings).

Loctite 272 Red or an equivalent product is required to seal the sleeve to the cylinder head. The injector sleeve should be replaced whenever it has lifted partially or completely out of the cylinder head during injector removal, when there is damage to the nozzle washer sealing surface, or when coolant is leaking from the sleeve or its o-rings.
