MSDS URL	
Error	An item with a MSDS Flag (NEMA# 5.285) value of "N" must not have an MSDS URL
Resolution	<ul style="list-style-type: none"> Export list of items with this error from the IDW Excellence Module. Determine if the MSDS Flag should be changed to "Y" for yes, or if the MSDS URL should be removed. <ul style="list-style-type: none"> <i>If the MSDS flag should be "Y", export the B1 data for these items, update the MSDS flag, and reload in the IDW.</i> <i>If the MSDS URL should be removed, extract the B2 Flat File from the IDW that includes each of the items on the error list, and insert "D" into the "Update Status Field" to remove the MSDS URL.</i> Load corrected B2 back to the IDW Check the IDW Excellence Module the next day for any remaining errors.
Error	An item with a MSDS URL must also have a MSDS Flag (NEMA# 5.285) value of "Y"
Resolution	<ul style="list-style-type: none"> Export list of items with this error from the IDW Excellence Module. Extract B1 Flat File from the IDW that includes each of the items on the error list. Confirm the URL should be present, then change the value to "Y" in the MSDS Flag Field on the B1 Extract. Load corrected B1 back to the IDW. Check the IDW Excellence Module the next day for any remaining errors.
<p><i>Note: The two errors above are the opposite of each other. Simply stated, if the item does not have a corresponding MSDS URL, then the flag must be set to "N" with no URL included. However, if the item does have a MSDS URL, the flag must be set "Y" with URL included. Furthermore, it must be understood that the flag setting resides on the B1 View, while the actual MSDS URL resides on the B2 View, so in some cases, two extracts and subsequent loads may be necessary for resolution.</i></p>
