

**Remanufactured Plunger
And Barrel Assemblies
For Power Stroke / HEUI
Injectors**

DIPACO
DIESEL
PARTS
U S A

DIPACO now has remanufactured plunger and barrel assemblies available for HEUI / Power Stroke injectors. Our P&B assemblies are remanufactured using the same controls and tolerances as new. The plungers are new and have a tungsten carbide coating for increased durability. The only component that is not new is the barrel. The first part numbers available are DPE06000/31R and DPE06060/31R.

There is a significant cost savings on our P&B assemblies. From time-to-time quantities may be limited due to supply, so be sure to place your orders right away.
