

Blasting below 100 PSI?

We've got a SnakeBite for you as well!

BlastOne's **NEW** Low Pressure Silencer (LPS) give contractors with limited pressure (65-85 psi) the same benefits as our revolutionary high pressure Snakebite nozzles!

SnakeBite XQ by BlastOne

Pair your SnakeBite blast nozzle with the suitable silencer.

LOW NOISE REDUCES YOUR RISK OF HEARING LOSS

The SnakeBite XQ reduces noise generated by up to 16 dBA – that's equivalent to up to 75% quieter than standard nozzles, and the typical high pitched screech is now gone.

Reduce the risk of operator and bystander hearing related injuries and increase your ability to comply with workplace noise regulations.

BLAST LONGER AND LATER IN NOISE SENSITIVE AREAS

Start blasting operations earlier and finish later with reduced noise impact on noise sensitive areas.

Reduce noise related exclusion zones in workshops, areas adjacent to blast rooms and site blasting operations. This will provide increased access and flexibility.

Reduce or eliminate sound absorbing barriers when blasting operations are conducted close to noise sensitive locations.

REDUCE THE RISK OF INJURY TO OPERATORS

Lower nozzle thrust reduces operator strain and increases the ability to control the nozzle – reducing the risk of manual handling related injuries and injuries related to loss of nozzle control.

Importantly operators will have more energy at the end of the day improving their quality of life.

LOWER NOZZLE THRUST REDUCES OPERATOR FATIGUE

The unique design of the nozzle and silencer reduces nozzle thrust by up to 45%. Operators can better maneuver the nozzle across the surface and will be less fatigued over the shift and on an ongoing basis – a key factor allowing high cleaning rates to be achieved throughout the shift and project.

Nozzle thrust reduces to that of a nozzle two sizes smaller when the silencer is fitted. Using a no. 7 SnakeBite XQ feels like you're using a standard no. 5 nozzle.

EASY TO USE

Noise and nozzle thrust reduction occur automatically across a wide range of operating pressures 70-110psi – simply screw on the silencer and away you go.

Slimline ergonomic nozzle jacket design reduces operator hand fatigue.

POWERFUL. STRIKING. QUIET.
BUT JUST ONE BITE WILL DO THE JOB

Blast QUIETER and LONGER using the NEW SnakeBite LPS!

UP TO **15%**
NOISE REDUCTION

UP TO **40%**
LESS OPERATOR FATIGUE

UP TO **4X**
LONGER BLAST LIFE
THAN TUNGSTEN CARBIDE NOZZLES

Which SnakeBite Silencer should you use based on your blast pressure?

Performance of the SnakeBite Blast Nozzle and Silencers are based on the pressure at the blast nozzle.

SLAKEBITES SOLVE KEY INDUSTRY CHALLENGES

Our proprietary engineering delivers lower noise, lower operator fatigue, and improved project outcomes... all supporting our Faster, Safer, Cleaner brand promise.
