

Valve Cover Gasket Kits For Ford 7.3L Power Stroke Engines

Improved 7.3L valve cover kits, along with the individual gaskets and wire harnesses, are now available. Improvements have been made to the wire harnesses, injector connector retaining clips, and the various moldings that make up the harness. The improved valve cover gaskets are made in the USA.

We offer two valve cover gasket kits for Ford 7.3L Power Stroke engines. DT730017 covers engines from 1994 to 1997 and DT730018 covers engines from 1998 to 2003. Each kit contains a valve cover gasket and under valve wiring harness. All components can be individually purchased. An engine-to-valve cover wiring set, sold separately, is also available for each application.

Note: quantities vary in each kit, see below for details.

DT730017 (1994 - 1997)

DT730021: Valve Cover Gasket (1 each)

DT730022: Under Valve Cover Wiring Harness (2 each)

DT730021

DT730022
