

VACUUM INTERCEPTOR DROP-OUT HOPPER

APPLICATIONS

The 55 cu. ft. Vacuum Interceptor Drop-Out Hopper not only separates abrasive and dust, but also serves as an excellent storage solution for used or new abrasive. When using new abrasive, the Interceptor can directly feed your blast pot. For waste abrasive recovery, the Interceptor efficiently transfers the material into disposal containers.

FEATURES

- Capacity of 4 tons of garnet (55 cu. ft. model)
- Designed to sit between the VacuLoad and the vacuum head
- Separates abrasive and 90% of dust for reuse or disposal
- Available in 3 sizes – 20, 55, and 100 cu. ft.
- Acts as a cyclone separator using power from the main vacuum unit
- No need for compressed air or electric power
- Ideal for abrasive storage

Part Number	Name
VAVacuInt20	20 cu. ft. Vacuum Interceptor Drop-Out Hopper
VAVacuInt55	55 cu. ft. Vacuum Interceptor Drop-Out Hopper
VAVacuInt100	100 cu. ft. Vacuum Interceptor Drop-Out Hopper
