

**Valve Cover Gasket Kit
For Ford 6.0L Power
Stroke**

DIPACO has available the valve cover gasket kit, part number DT600011, for the 6.0L Power Stroke application. The kit fits all 6.0L Power Stroke applications from 2003 to 2010.

Reuse of old molded rubber gaskets can result in oil leaks after a repair. With only a 5% decrease in the height of the rubber sealing bead the old gasket should not be reused. Installation of new gaskets during an injector replacement protects against future oil leak complaints.
