Oil Manifold Seal Kit for Cummins N14 with STC Injectors

Cummins N14 engines with STC injectors have an oil manifold and internal oil tubes which need to be removed and reinstalled whenever the injectors are removed. DIPACO has built a seal kit, **DPE14100**, for reinstalling the manifold and tubes.

The **DPE14100** seal kit consists of the following:

D3001340	O-Ring	6 each
D3052587	O-Ring	6 each
D3050867	Grommet	6 each

Each injector has a 3068014 internal oil tube. The **D3050867** grommet must be installed prior to installing the oil tube. The oil tube must be installed prior to installing the injector. Also, each tube requires one **D3001340** and one **D3050867** o-ring when the tube is installed.
