Throttle Shaft Assemblies - Caterpillar 3304/3306 Sleeve Metering Pumps Drive Gear and Spring Damper - Caterpillar Old Scroll Style Pumps

Throttle Shaft Assemblies

There are two throttle shaft assemblies, **D4N4320** and **D6N0248**, available for Caterpillar 3304/3306 sleeve metering fuel pumps. Both shaft assemblies are available from DIPACO. The difference between the two assemblies is the length of the shaft which extends from the governor housing. The **D4N4320** is the shorter one while the **D6N0248** is longer. Which shaft assembly to use is dictated by the application the pump is used in.

Gear Assembly and Spring Plate Damper

Caterpillar old scroll style fuel pumps use a gear on the end of the cam shaft to drive the governor weight assembly. The gear uses a spring plate as a damper. Both of these parts, **D5S5058** gear assembly and the **D1S0214** spring plate damper, are now available from DIPACO.
