### Addition to Injector, Valve Cover, and Oil Fill Installation Kit - Cummins B and C Engines

---

Early versions of Cummins B and C engines used an o-ring seal, **D3910824**, around the valve cover hold down screw instead of the current **D3928406** noise isolator. The noise isolator will not work on some of these early applications so we are now including the **D3910824** o-ring seal in the installation kits. Listed below and on the reverse side are the new kit contents. Please refer to DIPACO Product Information Bulletin FI-57, January 1999, for more information.
