### Valve Adjusting Kit - Cummins B and C Engines

---

Cummins B and C engines often require one or more valve covers to be removed for valve adjustment or some other reason not requiring replacement of the injectors. As Cummins recommends replacing the valve cover gasket whenever the valve cover is removed, DIPACO has introduced a gasket kit for these adjustments which includes the valve cover gasket and either the noise isolator or o-ring seal used with the hold-down screw. The **DPE59040** kit includes pieces for 6 cylinders while the **DPE59041** kit includes the pieces for one cylinder.

<b>Kit Components</b>	<b>DPE59040 (6 Cyl)</b>	<b>DPE59041 (1 Cyl)</b>
D3902666 Valve Cover Gasket	6	1
D3910824 O-Ring Seal	6	1
D3928406 Noise Isolator	6	1

For information on complete injector, valve cover, and oil fill installation kits for Cummins B and C engines, refer to DIPACO Product Information Bulletin FI-57, January 1999, and FI-64, May 1999.
