

Throttle Shaft Assemblies for Caterpillar

DIPACO Diesel Parts has five throttle shaft assemblies and one throttle shaft for Caterpillar applications.

The D1W5337 and D1W5339 throttle shaft assemblies are used in 3406B/C applications.

D1W5337

D1W5339

For 3304/3306 New Scroll fuel pumps, DIPACO has the D8N3088 and D8N5403 throttle shaft assemblies. The D8N5403 assembly is the longer assembly and D8N3088 is the shorter assembly. Which assembly is used varies by pump application.

D8N5403

D8N3088

The D4N2773 throttle shaft assembly is used in 3208 fuel pumps. DIPACO also has available the throttle shaft, part number D4N2773B, as a separate item. If the shaft is worn, and the stop plate is in good condition, the old plate can be pressed off and then pressed onto a new D4N2773B shaft.

D4N2773

The D8L8883 throttle shaft is used in Old Scroll fuel pump applications.
