

Cummins Rebuilt P&B Core Fee

In response to customer requests in our recent customer satisfaction survey, all **DIPACO** rebuilt plunger and barrel assemblies for Cummins will now be sold on an outright basis. There will no longer be any requirement to return a used assembly. This change is effective September 1, 2001. To receive any core credit for P&B assemblies purchased prior to this date, the used assemblies must be received at **DIPACO** no later than September 30, 2001.
