

## Torx® Bit Tool Kit

**DIPACO** now has available a tool kit, **DPE99051**, combining popular sizes of standard Torx® bit drivers plus two popular anti-tamper bit sizes. The kit also includes a driver and a carrying clip. Standard capscrews and drivers are a 6-point design while anti-tamper screws and bits are a 5-point design with a center post.

Following are the driver sizes included in the **DPE99051** kit:

6-point Bits	5-point Bits
T10	T25
T15	T40
T20	
T25	
T27	
T30	

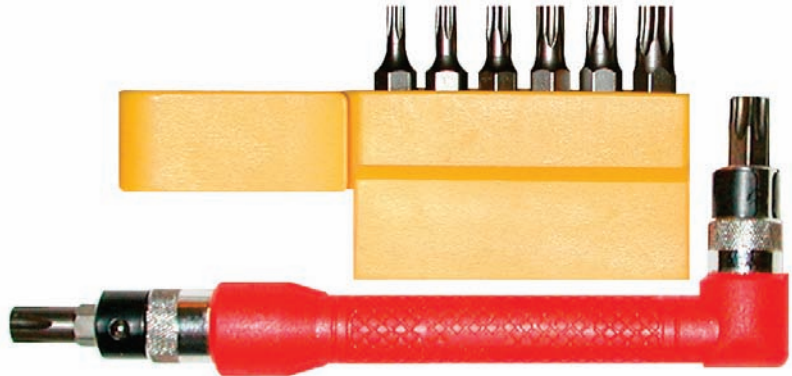

Standard  
6-Point Capscrew

Anti-Tamper  
5-Point Capscrew

Additional anti-tamper bits will soon be available as separate part numbers.

*The anti-tamper 5-point capscrews are used to meet U.S. federal regulation requiring fuel systems to have a greater resistance to tampering. These tools should only be used to assemble, repair, or adjust fuel systems according to factory specifications.*
