DIPACO / DTech has a range of popular-sized fuel injection test lines available. The lines are manufactured using AISI 100 specification metal tubing and include hardened line ends. Each line is identified by a metal tag. The test line pricing represents a terrific value when compared to other fuel line suppliers.

The most recent addition to our range of fuel injection test lines is D70262 for the Stanadyne DS pump application. Line size and end nut size information for all test lines can be found below.
