

Update to DPE3406BPM Gasket Set

The **DIPACO DPE3406BPM** gasket set is a pump mounting kit for use with Caterpillar 3406B and 3406C fuel systems. Caterpillar has used two different styles of timing advance units on these engines. In order to accommodate these different timing advance units, **DIPACO** has added a second timing advance o-ring to the kit, part number **D9X7715**, along with the **D4W0436** o-ring.
