

Installation Seal Kit for Cummins Select Injectors

DIPACO has released an external seal kit for Cummins Select injectors, part number **RTF26124**. The kit contains three injector external o-rings as well as the filter screen. Below are the kit contents:

D3070136	Upper O-Ring (Red)	1 each
D3070137	Middle O-Ring (White)	1 each
D3070138	Lower O-Ring (Blue)	1 each
D3071967	Filter Screen	1 each

These pieces should be replaced every time a Cummins Select injector is installed in order to provide for proper sealing. Also, it is important the filter screen not be reused in order to prevent fuel blockages.
