

**Updated Gasket Kit  
For Bosch, Zexel, and  
Denso EP / VE Fuel  
Pumps**

**DIPACO**  
**DIESEL**  
**PARTS**  
**U S A**

DIPACO now offers an updated version of the DPE60209 overhaul kit. The DPE60209 kit includes all of the gaskets, seals, o-rings, washers, and other items needed to repair EP / VE fuel pumps from any manufacturer.

Unique to the DIPACO kit is the inclusion of three different main shaft seals for use in either a Bosch, Zexel, or Denso pump. Also, these seals are double-lip construction instead of the standard single-lip seals.

Using the DPE60209 kit allows you to simplify your inventory and ordering requirements while insuring you always have the right kit available, regardless of the EP / VE fuel pump manufacturer, saving you both time and money.
