

Pop Tester Adapters for Cummins Select Injectors

In order to test the valve opening pressure of a Cummins Select nozzle without having to assemble the complete injector, **DIPACO** has available two nozzle pop test adapters. Part number **RTF26103** is used with L10, M11, and ISM injectors while adapter **RTF26106** is used with N14 injectors. The adapters are pictured below.

In order to test a nozzle, place the pressure spring, spring seat, spring cage, and nozzle on the pop test adapter and then install and tighten the nozzle nut.
