

DTech Remanufactured Ford 6.4L Power Stroke Injector

DTech now offers the remanufactured injector for the Ford 6.4L Power Stroke engine, part number DT640001R. All assembly and key characteristics including flow and response time are checked to meet DTech specifications.

The DTech 6.4L injector comes standard with a high-pressure injection line. The high-pressure injection lines on the 6.4L must be replaced with new lines any time they are loosened or removed. To accommodate this, DTech offers an injector mounting kit, part number DT640004.

Below is application information for DTech Ford 6.4L products.
