

Connector Parts for Cummins Celect Wiring Harness

In the May 2004 Product Information Bulletin FI-163 **DIPACO** announced the availability of the **RTF26125** wiring connector harness for Cummins Celect injectors. **DIPACO** now has available the individual components that make up the connector end of the wiring harness. Often the connector will be damaged while the wiring itself (the most expensive part of the harness) is still serviceable. These components will allow you to rebuild the connector side of the wiring harness. **RTF26125-1** is the connector and seal combination, **RTF26125-2** is the wedge lock, and **RTF26125-4** is a kit containing all three pieces. The seal, part number **RTF26125-3**, is available separately.

RTF26125-1
Plug and Seal

RTF26125-2
Wedge Lock

RTF26125-3
Seal

RTF26125-4
Kit
