

**Improved PMD  
Mounting Pad For GM  
6.5L DS Fuel Pumps**

When DTech reinvented the pump mounted driver (PMD) for the GM 6.5L DS pump every aspect of the PMD was analyzed and reengineered to combat the number one enemy: engine temperature. Now, we've looked at the PMD mounting pad and found room for improvement.

DTech is announcing a new PMD pad, part number DT650029. The DTech PMD pad is made from special fiberglass reinforced material for improved thermal performance over the Stanadyne pad.

**DT650029**
