DIPACODTECH.com

DTech now offers a full array of remanufactured injectors for Dodge 6.7L engines. Below you will find our full range of injectors for pickup and cab chassis applications.

DODGE 6.7L RAM 2500 + 3500 PICKUP

DT670001R: Covers model years 2007 - 2012

DT670009R: Covers model years 2013 - 2018

DODGE 6.7L RAM CAB CHASSIS

DT670006R: Covers model years 2007 - 2010.5

DT670007R: Covers model years 2010.5 - 2012

DT670008R: Covers model years 2013 - 2018

All DTech remanufactured Dodge 6.7L injectors feature 100% replacement of nozzle, control valve assembly and internal / external seals. All assembly and key operational characteristics including flow and response time are verified to meet DTech specifications.

Each injector, if required, is laser marked with an individual injector correction code (IQA) for entry into the electronic control module (ECM). The DT670008R and DT670009R injectors do not require and IQA code. Refer to [Product Information Bulletin FI-309](#) for additional information regarding IQA.

All injectors are covered by our two year, unlimited mileage warranty*.

For part number cross-reference, see the DTech 2019 Product Guide (currently available online at DIPACODTech.com).

Don't forget about DTech stainless steel inlet connectors (or tubes). You can buy them individually as part number DT670004 or in a discounted six-pack as part number DT670005. We recommend replacing a connector (tube) anytime you replace an injector. Refer to [Product Information Bulletin FI-326](#) for additional information regarding DTech inlet connectors.
