

FEATURES

- Non-Toxic • Non-Acid • Non-Alkaline • Non-Pathogenic • Non-Polluting

Reduces Suspended Solids

DIRECTIONS

Read Safety Datasheet before using this product.

General Odor Control—To eliminate odor caused by vomit, spoiled food, decomposed animals, and waste receptacles. Spray directly on malodor and allow bacterial action to work.

Carpet Deodorizing—Mix ½ to 1 pint of product per gallon of water. Apply with pump or trigger sprayer. Allow to remain moist for 30 minutes. Repeat if necessary. May be used with all types of carpet cleaning equipment and methods.

Grease Traps—Pour directly into sink or pipe closest to trap, typically at night. Flush with a cup of lukewarm water. Use 4–5 oz. daily for traps less than 20 cu. ft. For larger traps, use 8–10 oz. daily.

Porta-Toilets—Directly add 1 gallon and cover the solids with water. Repeat each time toilet is pumped.

Septic Tanks—Add 1 pint per 25 cu. ft. for initial treatment. Then use 8 oz. per week. Pour directly into toilet. If tank is clogged and odorous, add 1 gallon directly thru tank manhole.

Drain Lines & Down Pipes—Use 4 oz. for each 2 inches of pipe size 2–4 times weekly.

RECREATION VEHICLES—Initially use 2 oz. per gallon of water. Maintain at 1 oz. per gallon. For use at a dump station, use 1 gallon per 50 gallons of tank capacity.

LAUNDRY SPOTTER—Dilute 1:1 with water and apply directly to the laundry stain. Allow time for penetration. Launder as usual.

Do not release directly to surface water or groundwater. Neutralize pH before release to water treatment center.
