

**Valve Cover Gasket Kit  
For GM 6.6L LLY / LBZ /  
LMM Duramax +  
Service Information**

DIPACO / DTech now offers a valve cover gasket kit for the GM 6.6L LLY, LBZ and LMM 6.6L Duramax engines. Part number for the kit is DT660011.

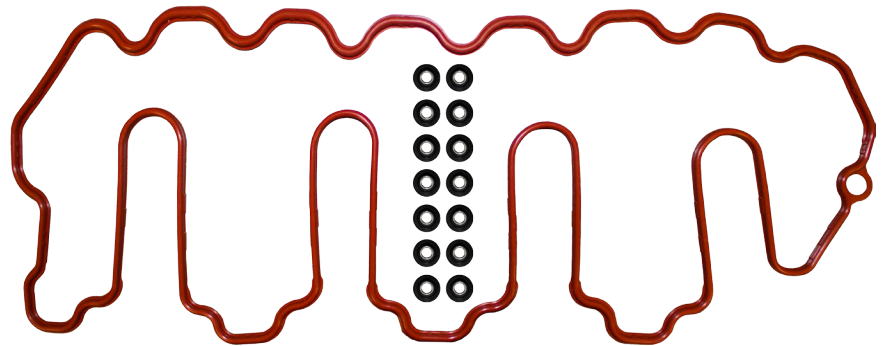

The kit includes one valve cover gasket (DT660016) and fourteen noise isolator grommets (DT660017). The valve cover gasket and the noise isolator grommets are available separately.

**SERVICE TIP:**

Replacement of molded rubber valve cover gaskets is recommended whenever there is visible physical damage or the sealing bead height has decreased by 5% or more. Installing new valve cover gaskets and noise isolator grommets help insure a leak free valve cover installation.

For information on the injector installation kit, part number DT660024, please refer to Product Information Bulletin FI-269. For information on the injector return line kit, part number DT660023, please refer to Product Information Bulletin FI-255.

For kit information on Duramax LB7 applications see DIPACO Product Bulletins FI-169 and FI-170.
