

**Valve Cover Gasket Kit
+ Service Information
For Dodge 5.9L 2003 –
2005 Pickup**

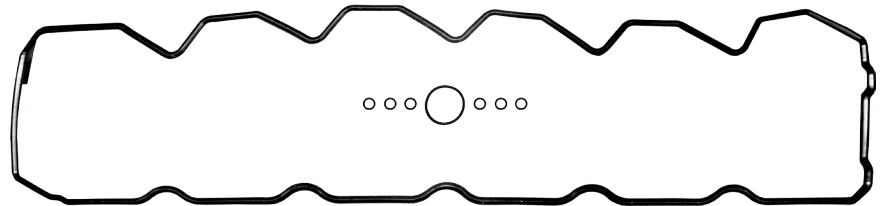

DIPACO / D Tech now has available the valve cover gasket kit for the 2003 – 2005 Dodge pickup with the Cummins 5.9L engine. Part number for the kit is DT590006.

The DT590006 kit includes one valve cover gasket, six retaining screw o-rings and the oil filler cap seal ring.

SERVICE TIP:

Replacement of a molded rubber valve cover gasket is recommended whenever there is visible physical damage or the sealing bead height has decreased by 5% or more. Installing new valve cover gaskets and related seal rings help insure a leak free valve cover installation.

For Dodge 5.9L 2006 – 2007 and Dodge 6.7L 2007 – 2013 applications refer to Product Bulletin FI-248.
